INTRODUCTION

- This manuscript is a summary of
 - o <u>https://www.tutorialspoint.com/wordpress/index.htm</u>
 - o <u>https://youtu.be/YWA-xbsJrVg</u>
 - o <u>https://youtu.be/E9YTRLm9SQs</u>
 - o https://themeisle.com/blog/install-xampp-and-wordpress-locally/
- WordPress is an open source Content Management System (CMS), which allows the users to build dynamic websites and blog.
- WordPress is the most popular blogging system on the web and allows updating, customizing and managing the website from its back-end CMS and components.
- Content Management System (CMS) stores all data such as text, photos, music, documents, etc. and is made available on your website.
- It helps in editing, publishing and modifying the content of the website.
- System Requirements for WordPress
 - Database MySQL 5.0 +
 - o Web Server -
 - WAMP (Windows)
 - LAMP (Linux)
 - XAMP (Multi-platform)
 - MAMP (Macintosh)

3 | PAGE

- Operating System Cross-platform
- o Browser Support
 - IE (Internet Explorer 8+),
 - Firefox,
 - Google chrome,
 - Safari,
 - Opera
- PHP Compatibility PHP 5.2+

Key Aspects of This Tutorial

4 PAGE

INSTALLING WORDPRESS ONTO YOUR LAPTOP

- We will follow the steps from here:
 - o https://themeisle.com/blog/install-xampp-and-wordpress-locally/

STEP 1: DOWNLOAD AND INSTALL XAMPP

- Go <u>https://www.apachefriends.org/index.html</u>
- Download XAMPP for Windows
- Run the installation
- You might see this:

😫 Ques	tion	\times
?	It seems you have an antivirus running. In some cases, this may slow down or interfere the installation of the software. Please visit the following link to learn more about this.	
	http://apachefriends.org/en/faq-xampp-windows.html#antivirus	
	Continue with installation?	
	Yes No	

- Disable your antivirus before proceeding.
- Then you might see this \rightarrow Just click OK

5 | P A G E

- You don't need everything \rightarrow Just select those in red:
 - o MySQL
 - o PHPMyAdmin

6 | P A G E

• Then go locate the folder htdocs

11 | P A G E

• Create a new folder called testsite

• Now extract all WordPress.zip files into the testsite folder.

12 | P A G E

STEP 4: CREATE A DATABASE FOR WORDPRESS

• Launch PHP Admin

• Click on Databases

13 | P A G E

• Type in testsite database, choose Collation (right at the top) and then click Create.

Databases		
🔒 Create database 🛞		
testsite database	Collation Collation	Create
Database 🔺 Collat	i armscii8	
information_schema utf8		
mysql utf8mb4	armscii8_general_ci armscii8_general_nopad_ci

INSTALLING THE ASTRA THEME

STEP 1: INSTALL THE ASTRA THEME

19 | PAGE

Type in Astra into the searchbox... then click install

STEP 2: INSTALL THE ASTRA PLUGIN

Type in Astra into the searchbox... then click install

21 | P A G E

22 | P A G E

Many themes will pop up... simply pick one...

Import the Complete Site

24 | P A G E

Your Selected Website is Being Imported!	×			
The import process can take a few minutes depending on the size of the sites and speed of the connection. Please do NOT close this browser window until the sites is imported completely.				
Installing Plugin - Elementor				
O Importing Cancel				

Just wait...

Imported Successfully!	×
Hurray! The Website Imported Successfully! Go ahead, customize the text, images and design to make it yours! Have fun! PS: We try our best to use images that are free from legal perspectives. However, we do not take any responsibility. We strongly advise website owners to replace the images and any copyrighted media before publishing them online.	
View Site I	

You can now preview the site template....

25 | P A G E

STEP 1: CUSTOMIZING THE PAGES WITH ELEMENTOR

EDITING THE PAGES WITH ELEMENTOR

26 | PAGE

Mouse over the "Home" and click "Edit with Elementor" should you wish to edit the Home page.

You will now see that the Elementor edit bar is on the left side of the page.

Since Elementor is intuitive and easy to use, we will skip teaching it.

Just click and play around with Elementor and you will get the hang of it very quickly

27 | PAGE

STEP 2: EXITING BACK TO THE WORDPRESS DASHBOARD

Once you are done editing the page, click on the 3 lines

Click Exit to Dashboard

<	elementor	
GLOBAL	STYLE	
1	Default Colors	
Α	Default Fonts	
O	Theme Style	
SETTING	35	
00	Global Settings	
ø	Dashboard Settings	
0	About Elementor	
MORE		
20	Preferences	
Q	Finder	
۲	View Page	
۱	EXIT TO DASHBOARD	

28 | P A G E

Edit with Elementor

You will now return to the Wordpress Dashboard.

29 | PAGE

STEP 3: ADDING MISSING PAGES

If you were to go to the main page \rightarrow <u>http://localhost/testsite/#</u>

You will notice that if you clicked on Service 1 or 2 or 3...

This occurs...

Pages < tests	site — WordPress X	Object not found!	×	+
$\leftrightarrow \ \ni \ G$	(i) localhost/service	es/#service-1		

Object not found!

The requested URL was not found on this server. The link on the <u>referring page</u> seems to be wrong or outdated. Please inform the author of <u>that page</u> about the error. If you think this is a server error, please contact the <u>webmaster</u>.

Error 404

<u>localhost</u> Apache/2.4.43 (Win64) OpenSSL/1.1.1g PHP/7.4.6

This is because we have not created any pages for them yet.

Go back to the Wordpress Dashboard... and Add a New Page

30 | P A G E

You realize that under All Pages, your new page called Service 1 has appeared.

However, if you were to click back on the Service 1 on the Home Page....

35 | P A G E

This occurs again...

Pages < tests	iite — WordPress X	Object not found!	×	+
$\leftarrow \ \rightarrow \ {\tt G}$	localhost/services	s/#service-1		

Object not found!

The requested URL was not found on this server. The link on the referring page seems to be wrong or outdated. Please inform the author of that page about the error. If you think this is a server error, please contact the webmaster.

Error 404

<u>localhost</u> Apache/2.4.43 (Win64) OpenSSL/1.1.1g PHP/7.4.6

This is because the pages are not linked.

36 | P A G E

STEP 4: LINKING NEW PAGES

37 | PAGE

You can see that the New Service 1 Page has Not been Added to the Menu Yet.

Select it and click Add to Menu

Add menu items	Menu structure		
Pages 🔺	Menu Name Navigation		Save Menu
Most Recent View All Search	Drag the items into the order you prefer. Click t	he arrow on the right of the item to reveal additional configuration options.	
Service 1 — Elementor	Home Fr	ont Page, Elementor	
About Elementor Services — Elementor	About	Elementor 🔻	
Contact — Elementer	Services	Elementor 🔻	
Select All	Service 1 sub item	Elementor 💌	
Posts v Custom Links v	Contact	Elementor 🔻	
Categories •	Menu Settings		
	Auto add pages	Automatically add new top-level pages to this menu	
	Display location	Primary Menu Footer Menu	
	Delete Menu		Save Menu

38 | PAGE

Navigate back to view the Service 1 page you have created earlier

You will see that when you mouseover the down arrow, the Service 1 page appears.

Click on it and copy the link

That is, <u>http://localhost/testsite/service-1/</u>

39 | PAGE

Nav5gate back to the Homepage, and click Edit with Elementor.

Click on the Service 1 link and paste the link into the box.

This will enable it to hyperlink to the site you want.

Should you want the new page to open in a new window, do as per below.

Set custom attributes for the link element. Separate

40 | P A G E

STEP 5: EDITING HEADER AND FOOTERS OF THE PAGE

Elementor allows you to edit the main body of the web page.

But editing the Header and Footer of the page is not as easy.

Mouse around and you will see a blue box appear at the logo and main buttons of the header.

Click it to edit.

41 | P A G E

However, should you realize that the Footer cannot be edited (because the blue box doesn't appear), you can try below.

MOVING YOUR SITE FROM YOUR LAPTOP TO A LIVE SITE

- Once you have completed editing your site, its time to go live.
- However, its important to understand two terms first:
 - o Domain Registration
 - Domain = Name of your Website (for example <u>www.AlvinAng.sg</u>)
 - It can be of many formats: anything like mywebsite.com, or .in, or .net, or .org.
 - Domains aren't free and you have to pay and register for it.
 - However, many providers will give you a one-year free domain registration upon signing up with them.
 - Google around to see if your domain name has already been taken.
 - o Hosting Account
 - A hosting account provides a space for storing your website files on the internet.
 - You can google for many web hosting services, many of them for a great bargain.
- Let's take for example this: <u>https://sg.godaddy.com/offers/wordpress-hosting</u>
- GoDaddy provides both Domain registration and Web Hosting at the same time (bundling it to give you better offer).
- GoDaddy is just one of the many web hosting providers.

STEP 1: REGISTER A DOMAIN AND SETUP A HOSTING ACCOUNT (PAYMENT!)

• Since the registering and payment details are fool-proof and straightforward, I will skip the explanations.

43 | P A G E

- However, should you wish to view the process, you may go here:
 - o <u>https://youtu.be/E9YTRLm9SQs</u>
 - Note that this video tutorial also teaches you how to install WordPress onto your hosting site.

STEP 2: BRINGING IN YOUR WEBSITE FROM LAPTOP TO LIVE SITE

- Now you have WordPress installed on both your Laptop as well as Host site.
- You will need a plugin called "All In One WP Migration".
- Install this plugin on both WordPress (laptop and host site).
- Thereafter, use that plugin to download the entire website (from your laptop) into a file.
- Then go to your live host site and use the same plugin to import that file.
- That's it! Your entire site is now live!
- Once done, should you wish to continue editing your Live Site, just do this:
 - At your browser, type in: Yoursite.com/login
 - And you will be brought to your WordPress admin page.
 - Login to edit.
- Please see the following below for a step by step....

Go to both your WordPress (laptop + host site) and install the plugin "All In One WP Migration"

45 | PAGE

Likewise, simply go to your WordPress (which is installed on your Live Site), use the All In One Plugin to import the file.

That's it!

Your site is now live!

46 | P A G E

Dr. Alvin Ang earned his Ph.D., Masters and Bachelor degrees from NTU, Singapore. He is a scientist, entrepreneur, as well as a personal/business advisor. More about him at <u>www.AlvinAng.sg</u>.
