

SKILLS FRAMEWORK FOR INFOCOMM TECHNOLOGY SKILLS MAP – HEAD OF DATA SCIENCE AND ARTIFICIAL INTELLIGENCE

	SKILLS MAP - HEAD OF L	DATA SCIENCE AND ARTIFICIAL INTELLIGENCE			
Sector	Infocomm Technology				
Track	Data and Artificial Intelligence				
Occupation	Data Scientist/Artificial Intelligence Scientist				
Job Role	Head of Data Science and Artificial Intelligence				
Job Role Description	The Head of Data Science and Artificial Intelligence formulates and implement data and artificial intelligence (AI) strategies to optimise business value derived from data assets. He/She guides the AI research direction to create new algorithms and models, and reviews the feasibility of translating research and development outcomes into data and AI solutions. He oversees the development of data and AI solutions for the business to inform strategy and planning, decision-making and drive performance. He identifies potential intellectual property commercialisation opportunities for AI solutions and/or models, and oversees the preparation and application for intellectual property rights. He manages a team and is proficient in statistics, scripting and programming languages required by the organisation. He is also familiar with the relevant software platforms on which the solution is deployed on. The Head of Data Science and Artificial Intelligence is a highly effective communicator, articulating the potential value and impact of data and AI solutions on the business and influencing key business stakeholders. He is a proactive and innovative individual, possessing a strong drive to succeed amidst an evolving business environment. He develops the data and AI team's technical and leadership capabilities, and ensures compliance to the organisation's data privacy policies, ethics and governance framework, and				
	Critical Work Functions	Key Tasks	Performance Expectations		
Critical Work Functions, Key Tasks and Performance Expectations	Implement data and artificial intelligence (Al) strategy	Formulate and implement strategies to identify, acquire and use appropriate data and AI models Guide AI research direction based on the current and future needs of the organisation Drive implementation of new data management technologies Drive the organisation's AI research and development strategy and focus Communicate and ensure compliance to the organisation's data privacy policies, and ethics and governance framework Direct engagement initiatives to communicate the potential and value of data and AI across the organisation Review research and development outcomes to ensure alignment with the organisation's vision, mission and values, and data and AI strategy Establish internal policies and processes to perform regular model tuning to cater for changes in customer behaviour over time	In accordance with: • Model AI Governance Framework • Personal Data Protection Act 2012, Personal Data Protection Commission		
	Formulate objectives and requirements from a business perspective	Develop feasibility analysis plans for AI and Data Science Projects based on business requirements and expected outcomes Synthesise insights from research on emerging trends, market developments and environmental scans to support feasibility analysis Approve proposed AI solution for development based on an evaluation of cost-benefit, competitive and feasibility analysis Communicate insights of feasibility analysis and relevant success strategies with key business stakeholders for decision making Build partnerships with key service partners and customers within and across industries to accelerate the adoption of Data Science and AI initiatives
